

IEEE Transportation Electrification Community eNewsletter

The IEEE Transportation Electrification Community (TEC) eNewsletter is a quarterly electronic publication targeted at IEEE TEC members interested in various topics which are related to transportation electrification. Each quarter, the TEC newsletter will focus on a theme, and articles will address state-of-the-art as related to that theme. Land, marine, and aerospace transportation applications are all of interest.

The goal of the TEC eNewsletter is to bring global experts from industry, academia, and government, to share early thoughts, findings, and concerns that can trigger further discussions through the newsletter itself, in addition to TEC-affiliated workshops, conferences, and publications. News regarding major breakthroughs that can transform transportation electrification, new transforming products, as well as transportation-electrification-related activities are also of interest.

Call For Articles *Special Issue Focusing on Students and Student Competitions*

Do you know of a student team at your organization involved with a program? We'd like to hear what they are doing, how they are dealing with competition and covid, what they are looking forward to.

Do you know an organizer program that would like to provide a short article about their program? We'd like to hear how they adapted during covid, a history of their program and how they are looking forward.

Some programs that we are aware of are:

- AIAA/IEEE EATS Student Design Challenge
- American Solar Challenge
- ECOCAR MOBILITY CHALLENGE
- Formula Hybrid
- Formula SAE® Electric
- NASA Human Exploration Rover Challenge

Articles in the above area are welcome for a special issue focusing on Students and Student Competitions.

Submissions should be 800-1,200 words and single-spaced and single-column including all figures and references. Send your submissions to TEC-eNewsletter@ieee.org
