

IEEE Transportation Electrification Community eNewsletter

The IEEE Transportation Electrification Community (TEC) eNewsletter is a quarterly electronic publication targeted at IEEE TEC members interested in various topics which are related to transportation electrification. Each quarter, the TEC newsletter will focus on a theme, and articles will address state-of-the-art as related to that theme. Land, marine, and aerospace transportation applications are all of interest.

The goal of the TEC eNewsletter is to bring global experts from industry, academia, and government, to share early thoughts, findings, and concerns that can trigger further discussions through the newsletter itself, in addition to TEC-affiliated workshops, conferences, and publications. News regarding major breakthroughs that can transform transportation electrification, new transforming products, as well as transportation-electrification-related activities are also of interest.

2022 First Quarter Theme: Open Topic Submissions

This issue will include open topics in transportation electrification systems. These include but are not limited to aircraft, marine, and ground electrification; sensors, fleet management and infrastructure; cybersecurity and community networks; energy storage and management; system integration; policies and regulations; and others.

Submissions should be 800-1,200 words and single-spaced and single-column including all figures and references.

Submit your article online at: <https://bit.ly/3klgD3p>
